

Linda Davies
Imperial College, London, UK

Linda joined Imperial College London in 1999 from an air quality policy/consultancy background to study urban ecology. Current interests include urban ecosystem assessment, development of European Standards for biological monitoring, public engagement in research, research impacts and lichenology, the latter pursued as an associate scientist at the Natural History Museum and through membership of the British Lichen Society Council. Linda is Director of OPAL, a £13million, multi-disciplinary consortium programme involving 16 partners. OPAL provides opportunities for people to engage in the development and delivery of research through partnerships with universities, national ecological surveys, and educational programmes.
